

Title: SmartMap

Who: Tristan Wagar, Oliver Hanna, Connor Fitzgerald

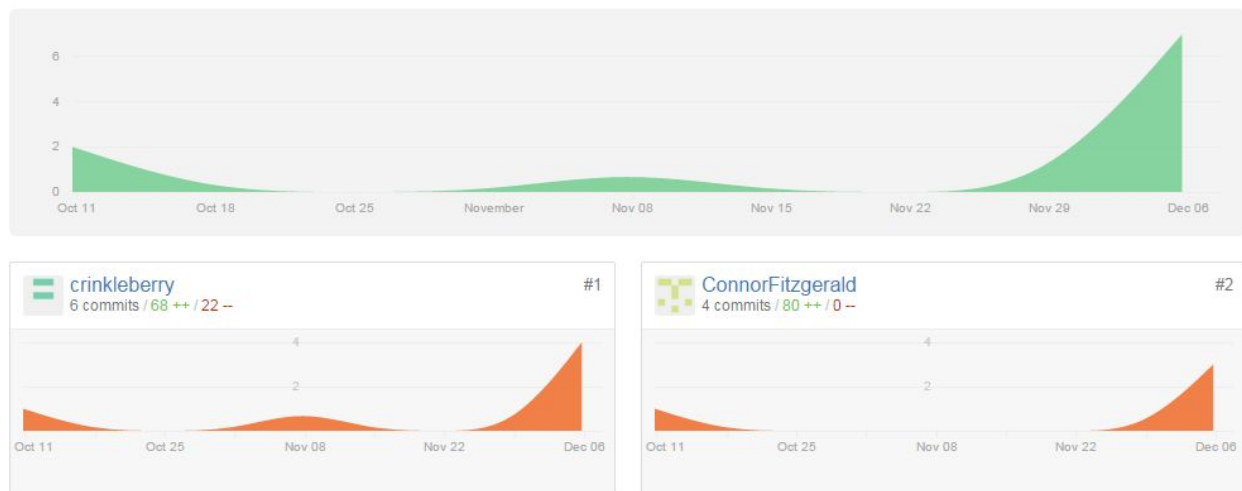

Project Tracker: <https://trello.com/b/Sn543Fd2/3308-project>

Video: <https://www.youtube.com/watch?v=O3yI9d87BhU>

VCS: <https://github.com/crinkleberry/CSCI3308-Project>

Screenshot:

Deployment:

Due to the current issues with hosting on Heroku, it will have to be ran locally on your machine. Please check smartmap.herokuapp.com first to see if the web app has been deployed to heroku.

Install PostgreSQL: <http://www.postgresql.org/download/>

Install NodeJS: <https://nodejs.org/en/download/>

Make sure you are in the project directory in the terminal: `./CSCI3308-Project/project`

Create a db for psql: `psql createdb smartmapdb`

Run sql script: `psql -d smartmapdb -f ParkingDB.sql`

Start a psql instance on localhost:5432

Type: `npm install`

Type: `npm start`

Go to localhost:3000 on browser.

Auto-doc: After much research and discussion we decided that an auto documentation tool would be pointless in the case of our project. Our code is self commenting as it is written in HTML, CSS, and little Javascript and any capable programmer will be able to fully understand the code we currently have. We only have one function that is painfully obvious to what it does and the rest is intermittent jQuery and Javascript that doesn't need documentation.
